Revision History
Revision 1.0 Aug 18, 2006

*Before using this reference, it is important to understand that the following indices list chipsets used in various devices and not necessarily specific device models. It is also important to note that this reference is compiled using information automatically derived from the associated kernel driver sources as well as information contained in the **PCI ID Repository** maintained by Martin Mares at <http://pciids.sourceforge.net>.*

Overview

The following reference provides a comprehensive list of device chipsets supported by NASLite-2. This reference attempts to list all supported network and storage interface devices by type and manufacturer. It is also possible that NASLite-2 will work well with other devices not explicitly identified by this reference.

This reference covers the following device types:

- Network Interface Devices
- IDE Controller Devices
- SATA Controller Devices
- SCSI Controller Devices
- Hardware RAID Controller Devices

How to Use This Reference

NASLite-2 supports a wide array of PCI devices. Many computers utilize a motherboard with a built-in or on-board PCI network and storage interface adapters while others can use separate add-on interface cards. NASLite-2 will work well with most PCI interfaces provided a supported chipset is used.

Each driver included with NASLite-2 supports one or more associated device chipsets. There are many unique device makes and models that may use the same chipset. To verify if a particular device is supported by NASLite-2, make sure to reference the associated chipset and not the unique device make or model.

For example, let's assume that we have a Netgear model GA311 Gigabit Ethernet adapter. Referencing the listed devices under the **Netgear** heading reveals that the GA311 is not listed. On closer examination however, we can identify the associated

GA311 chipset as the popular RTL-8169 by Realtek Semiconductor. Referencing the listed devices under the **Realtek Semiconductor** heading reveals that RTL-8169 Gigabit Ethernet is listed. That in turn is a pretty good indication that our Netgear GA311 Gigabit Ethernet adapter is fully supported by NASLite-2 and will likely operate well if properly installed and configured.

Network Interface Devices

NASLite-2 supports a wide array of PCI network interfaces. Many computers utilize a motherboard with a built-in or on-board PCI network interface while others can use separate add-on network interface cards. NASLite-2 will work well with most PCI network interfaces provided a supported chipset is used. Below is a general list of chipset drivers included in the NASLite-2 kernel:

3Com Corporation

- **3Com 3c59x/3c9xx Ethernet Driver**
 - 3c450 HomePNA [Tornado]
 - 3c555 Laptop Hurricane
 - 3c556 Hurricane CardBus [Cyclone]
 - 3c556B CardBus [Tornado]
 - 3c575 Megahertz 10/100 LAN CardBus [Boomerang]
 - 3c590 10BaseT [Vortex]
 - 3c592 EISA 10Mbps Demon/Vortex
 - 3c595 100Base-MII [Vortex]
 - 3c595 100BaseT4 [Vortex]
 - 3c595 100BaseTX [Vortex]
 - 3c595 Megahertz 10/100 LAN CardBus [Boomerang]
 - 3c597 EISA Fast Demon/Vortex
 - 3c900 10BaseT [Boomerang]
 - 3c900 10Mbps Combo [Boomerang]
 - 3c900B-Combo Etherlink XL [Cyclone]
 - 3c900B-FL 10base-FL [Cyclone]
 - 3c900B-TPC Etherlink XL [Cyclone]

- 3c900B-TPO Etherlink XL [Cyclone]
- 3c905 100BaseT4 [Boomerang]
- 3c905 100BaseTX [Boomerang]

IDE Controller Devices

NASLite-2 supports almost all IDE controller chipsets commonly found on commodity PC hardware. Optimized, chipset-specific drivers for most common devices are provided. In addition to IDE, many SATA chipsets can be driven in "Legacy Mode" using the appropriate IDE driver. Other more obscure devices are also likely to be supported by the included generic IDE driver. NASLite-2 includes support for the following IDE controller chipsets:

Advanced Micro Devices [AMD]

- **AMD PCI IDE Driver**
 - AMD-755 [Cobra] IDE
 - AMD-756 [Viper] IDE
 - AMD-766 [ViperPlus] IDE
 - AMD-768 [Opus] IDE
 - AMD-8111 IDE

SATA Controller Devices

NASLite-2 supports a good number of SATA controller chipsets commonly found on PC motherboards or on SATA PCI adapter cards. Optimized, chipset-specific drivers for most common SATA devices are provided. In addition, many SATA chipsets can be driven in "Legacy Mode" using the appropriate IDE driver. This approach may be best suited for more obscure devices that are not supported directly by the included low-level SATA drivers. It is important to note that the following SATA devices are supported in non-RAID mode only. NASLite-2 includes support for the following SATA controller chipsets:

ALi Corporation

- **AHCI SATA Controller Driver**
 - ULi M5288 SATA
- **ULi Electronics SATA Controller Driver**
 - ALi M5281 Serial ATA / RAID Host Controller
 - ULi 5287 SATA
 - ULi 5289 SATA

Hardware RAID Controller Devices

NASLite-2 supports true hardware RAID controllers only. RAID functionality is not supported with software RAID or “Fake RAID” controllers. The following list includes all supported IDE, SATA, SCSI, etc. hardware RAID controllers. Due to the relatively high cost of hardware RAID controllers, chipsets as well as specific card models are listed. The following list provides considerably more details compared to previous sections in this reference. NASLite-2 includes support for the following hardware RAID chipsets and controllers:

3ware Inc

- **3ware Storage Controller Driver**
 - 7xxx/8xxx-series PATA/SATA-RAID

Acer Incorporated [ALI]

- **LSI Logic MegaRAID Controller Driver**

- PM2865U3 Ultra3 Dual Channel

Getting NASLite-2

NASLite-2 CD-ROM or a downloadable CD-ROM ISO image is available for purchase from the Server Elements (www.serverelements.com) website.

NOTE: *NASLite-2 is a commercial product and is not freely distributable. Please do not make or distribute illegal copies. Doing so is not only illegal, but undermines our efforts and further impedes our ability to develop the product.*

Internet Resources

Additional information, the latest releases, as well as well-mediated user forums covering NASLite-2 and related OS products can be found on the Server Elements (www.serverelements.com) website. In

addition to this manual, the user forums are the best place for information regarding the use, administration and maintenance of your NASLite-2 file server.

Disclaimer

The information in this document is provided 'as is' without warranty or guarantee of any kind. The user assumes the entire risk as to the results and the performance of the information.
